Inspiring Resilience

RESILIENCE = COMPETITIVE ADVANTAGE

Resilience is the ability of an organization to absorb and adapt in a changing environment. (ISO 22316:2017)

It is not just a defense mechanism, but mostly a quality that allows to succeed and prosper in the market.

Three key disciplines of resilience

Business Continuity

Capability of an organization to continue delivery of products or services at acceptable predefined levels following disruptive incident

Crisis Management

Capability to manage crises, defined as abnormal and unstable situations that threaten the organization's strategic objectives, reputation or viability

Enterprise Risk Management

Capability to manage risk, defined as the effect of uncertainty on objectives

BUILDING RESILIENCE

PANTA RAY supports its clients in aligning their organizational resilience capabilities to the relevant international standards and industry best practices.

As members of the ISO Working Groups for international standards on societal security, we promote a culture of resilience based on the latest developments in the industry. We do so by analyzing the client's resilience documentation and practices, in order to assess their level of compliance to international standards. Based on this, we offer our expertise and hands-on experience to support our clients, with methodological consults and practical assistance alike.

Quality review

Assessment of your organizational resilience framework with respect to current international standards

Collecting and analyzing relevant documentation of your current resilience framework

Interviewing key people within the organization, to better understand organizational resilience practices

Producing a point-by-point evaluation within an overall report on the state of the art of your resilience

Guiding the client through the continuous improvement process
